Introducing the Human Brain The human brain is the most complex organ in the body. This three-pound mass of gray and white matter sits at the center of all human activity—you need it to drive a car, to enjoy a meal, to breathe, to create an artistic masterpiece, and to enjoy everyday activities.

Drugs and the Brain | National Institute on Drug Abuse (NIDA)

The brain is an organ that serves as the center of the nervous system in all vertebrate and most invertebrate animals. The brain is located in the head, usually close to the sensory organs for senses such as vision. The brain is the most complex organ in a vertebrate's body. In a human, the cerebral cortex contains approximately 14–16 billion neurons, and the estimated number of neurons in ...

Brain - Wikipedia

Neurotechnology is any technology that has a fundamental influence on how people understand the brain and various aspects of consciousness, thought, and higher order activities in the brain. It also includes technologies that are designed to improve and repair brain function and allow researchers and clinicians to visualize the brain.

Neurotechnology - Wikipedia

The fetal brain grows enormously during pregnancy, both in terms of its size and the number of neurons it has. Different gaits employed by animals and how the nervous system is able to switch between them. Also available in Spanish. Electrical and chemical signals are used by neurons to communicate ...
