Advances in Materials Science and Engineering (ISSN : 2578-7217) provides a forum for publishing papers with in-depth understanding of extraction, synthesis, processing, structure, properties, and performance of materials that enable an engineering function.. This journal also emphasize applications of Materials in electronics, communications, medicine, transportation, manufacturing, recreation ...

Fusion power is a theoretical form of power generation in which energy will be generated by using nuclear fusion reactions to produce heat for electricity generation. In a fusion process, two lighter atomic nuclei combine to form a heavier nucleus, and at the same time, they release energy. This is the same process that powers stars like our Sun. Devices designed to harness this energy are ...

Dogs have been present in North America for at least 9000 years. To better understand how present-day breeds and populations reflect their introduction to the New World, Leathlobhair et al. sequenced the mitochondrial and nuclear genomes of ancient dogs (see the Perspective by Goodman and Karlsson). The earliest New World dogs were not domesticated from North American wolves but likely ...

The Advanced Research Projects Agency "Energy" (ARPA-E) intends to issue a new Funding Opportunity Announcement (FOA) that would seek to enhance the pace of energy innovation by accelerating the incorporation of machine learning into the engineering design processes for energy technologies and systems.
