The European Parliament's 751 members are directly elected every five years by universal suffrage. It organises itself as a normal multi-party parliament in conducting most of its work in its committees and sitting in political groupings rather than national delegations. However, its political groups are very weak due to their status as broad ideological groups of existing national parties.

In mathematics, an ordinary differential equation (ODE) is a differential equation containing one or more functions of one independent variable and its derivatives. The term ordinary is used in contrast with the term partial differential equation which may be with respect to more than one independent variable.. A linear differential equation is a differential equation that is defined by a ...
