Bridging Bridging Clinical Medicine and Diagnostic Science EAC utilizes its deep expertise in diagnostics to bridge clinical medicine and diagnostic technology. On one side, we follow medicine to paint an accurate picture that we can provide to IVD companies of unmet medical needs or the possible impact of a new technology. On the other side, [â€¦]

Genetic analysis is the overall process of studying and researching in fields of science that involve genetics and molecular biology. There are a number of applications that are developed from this research, and these are also considered parts of the process. The base system of analysis revolves around general genetics.

Molecular genetics is the field of biology that studies the structure and function of genes at a molecular level and thus employs methods of both molecular biology and genetics. The study of chromosomes and gene expression of an organism can give insight into heredity, genetic variation, and mutations. This is useful in the study of developmental biology and in understanding and treating ...
